

SafetyVital

**SELF-DEFENSE STUN
GUN FLASHLIGHT**

USER MANUAL

Prior to use, the user must read the following instructions carefully and pay special attention to the safety & precautions to ensure proper product operation. Keep this user manual for further reference.

WARNING

DANGER - ELECTRIC SHOCK.

To avoid accidental discharge, always move the on/off switch to the "off" position when not in use. The user must abide by all local laws governing the possession and use of stun guns. Do NOT expose your eyes to the LED light. Keep away from children under the age of eighteen (18).

- LED Light: 110 Lumens
- Material: Aluminum Alloy and Plastic
- Lifespan: Approximately 800 Times once fully charged
- Stun Gun Voltage: 1900KV

PRODUCT OVERVIEW

INSTRUCTIONS FOR USE

The Power/Mode Switch has four Operating Settings:

1. Middle Switch Position - The device is powered off
2. Upward Switch Position - Activates the LED Flashlight. The switch activates three different modes. First slide up activates the bright light. Second slide up activates the SOS flashing light. Third slide up activates the dim lighting.
3. Downward Switch Position - Activates the Stun Gun Mode

USING THE STUN GUN

Turn the Stun Gun Power Switch On, located at the bottom end of the flashlight. The warning light located at the bottom end of the flashlight will automatically illuminate red, letting you know that the device is set to Stun Gun Mode. Set the Power/Mode Switch to the Stun Gun position (downward) and put the tip of the stun gun directly in contact with the assailant. Press the red Shock Button to activate.

Note: While holding the stun gun against the body, you will not see or hear the spark. You can continue to fire the stun gun for as long as necessary without damaging the device.

The most effective stun areas include shoulders, hips, thigh, buttocks, and below the ribcage.

Effects of the Stun Gun

- A shock from the stun gun lasting one second or less will cause pain and minor muscle contractions.
- Stunning the assailant for 1 to 2 full seconds will cause muscle spasms and a dazed mental state.
- Stunning the assailant for 3 to 5 full seconds will result in loss of balance and muscle control.
- DANGER: Long-term electric shock causes damage to the human body.

Recharge the Device

To recharge, insert the provided cord to the charging port located on the bottom of the handle of the device. Extend the cord and insert the AC plug end into a standard 110v/220v AC wall socket. Charge time is approximately 5 hours.

WARRANTY

1-Year Limited Manufacturer's Warranty

Your SafetyVital product is backed by a one-year limited manufacturer's warranty. For a period of one year following date of purchase, SafetyVital will repair or replace your device should it fail due to a manufacturer's defect (subject to certain limitations such as, but not limited to, use of the device as directed or performing the intended function during which the product may become damaged).

This one-year limited warranty does not cover any damage that results from unauthorized or improper use, service, or repair. Further, it does not cover damage caused by accident, intended function and use as directed, negligence, or normal wear and tear. Should you discover your SafetyVital product is not functioning properly, please send your device to our repair center for evaluation, at the address listed below. If your product cannot be repaired or serviced, we reserve the right to exchange it for a similar or newer model.

Please note that a flat processing fee of \$10.00 will be charged to cover the service evaluation and return shipping of your device. All limited warranty claims must be accompanied by a copy of your proof of purchase from an authorized retailer. Please send your device, proof of purchase, and a check or money order in the amount of \$10.00 made out to SafetyVital to:

Address:
