ANDROID QUICK START GUIDE

You will need an app called "Files" to get the best experience with Photo Mojo for Android. **Files is a genuine Google app and totally free.** Go to the google play store, search "files" and install the app that looks like the image on the right. Once the Files app is installed, insert the Photo Mojo into the micro usb (or USB-C) port on your android device. The device will not take any action. **Open the Files app you just downloaded.**

3. Now you will see your photos and videos.

In the upper right hand portion of the screen you will see 3 dots that opens a menu. **Tap the three dots and tap select all.** If you don't want to select every picture and video you can de-select them by tapping the ones you don't want to copy.

1. If the app asks you to "allow" access, always tap "allow."

At the bottom of the screen you will see "clean, browse and share." Tap on "Browse."

Do NOT use "categories."

Tap on "Internal Storage."

4. Now that the photos and videos are selected, **tap the three dots again.** You will see the option to "move to" or "copy to." **Tap "Copy to."** **Choosing "Move to" will delete the items from your device. Only do this if you need to free up space on your device.**

At the bottom of the screen **Tap "iUSB."**

2. Pictures and videos are in the "DCIM" folder. You can transfer files from any folder. **Tap on DCIM first.** In DCIM you will see a few difference folders.

The folder called "Camera" is where you will find pictures and videos taken with your device's camera. Pictures from other sources are in the other folders. **Tap on Camera.**

5. Tap "Copy here" at the bottom of the screen.

You will see a progress bar as the files are copying. For a large number of files this could take a little time. **When you see "files copied" at the bottom of the screen, you are done.**

It is now safe to eject the Photo Mojo. Your files are on the Photo Mojo!
