

LELO
HEX™

The Condom Re-Engineered

YOUR CONDOM IS OUT OF DATE.

OUR WORLD HAS CHANGED. THE CONDOM HASN'T. UNTIL NOW.

WHAT IS LELO HEX™?

LELO HEX™ is the condom re-engineered. 7 years in development, HEX™ is a condom that doesn't compromise on pleasure, on strength or on safety. Thanks to its completely unique hexagonal structure, HEX™ offers a bespoke fit to enhance the sensitivity and intimacy of sex for both partners.

HOW DOES LELO HEX™ WORK?

LELO HEX™ delivers strength, thinness and sensation through its revolutionary hexagonal structure. It's the first major innovation in years, and the media all over the world is calling it one of the most important advances in condom technology for decades.

With its structure of 350 interconnected hexagons, HEX™ allows for a more sensitive and more intimate sexual sensation, as well as a more secure fit that gently grips the wearer to fight slippage. Perfectly smooth on the outside, textured on the inside; the hexagonal web within flexes and stretches to fit a wide number of shapes securely.

ABOUT LELO

LELO is the world's leading designer brand for intimate lifestyle products. Launched in 2003, LELO is famous for transforming the look, feel and function of how personal massagers are perceived, bringing a new level of luxury to products of this kind.

Applying the same commitment to quality, design and innovation across all product lines, LELO's unique portfolio now extends through bedroom accessories, personal massagers known as Pleasure Objects, massage oils, and soy massage candles.

INDIVIDUAL CELLS

The network of cells allow no compromise. At just 0.045-0.055mm thick, HEX™ is one the thinnest condoms on the market.

UNIQUE DESIGN

Inspired by nature, the design molds to the wearer like nothing else.

SAFETY

HEX™ not only meets but also succeeds all international safety standards. Furthermore, we electronically test each and every condom we ship to ensure the highest quality.

HEXAGONAL STRUCTURE

350 individual hexagonal cells networked together distribute energy and provide a little extra hold on the wearer to limit slippage.

Material: Natural Latex
Thickness: 0.045mm
Diameter: 54mm (Standard size)
Length: 180mm
